PROFILE SUMMARY

Frontend Developer with strong experience in **HTML**, **CSS**, **JavaScript**, and **React.js**. Experienced in building responsive, component-based user interfaces and consuming RESTful APIs, Familiar with backend fundamentals using **Node.js**, **Express.js**, and **MongoDB**, including building basic APIs and handling client-server communication, actively learning full-stack development and focused on writing clean, maintainable code.

Experienced .NET Backend Developer skilled in **C#**, **ASP.NET Core**, and **Entity Framework**. Strong background in **Restful APIs** and **SQL Server**. Excellent problem-solving abilities and a collaborative mindset focused on delivering high-quality software solutions.

Ability in building responsive, high-performance web interfaces using **React.js**, focusing on **clean code architecture**, state management, and optimized rendering to ensure a seamless user experience.

A purposeful individual and an analytical person, looking to join a progressive organization offering a stable and positive working environment to use experience.

PROJECTS

Fashionista Finds | **React.js & Tailwind CSS** | [\[Live Demo\]](#)

- **Technologies:** React.js, Redux Toolkit, Vite, React Router, Axios, React Bootstrap.
- Developed a fully responsive e-commerce web application with a modern UI, utilizing **React.js** and **Vite** for optimized performance.
- Implemented global state management using **Redux Toolkit** to efficiently handle shopping cart functionality and product data flow.
- Integrated **Fake Store API** to fetch and dynamically render product categories and details, improving data handling skills with **Axios**.
- Built seamless navigation and user flow using **React Router v7**.
- Enhanced user experience with interactive UI components (carousels, toast notifications) using **React Slick** and **React Hot Toast**.

Full-Stack HR Management System | [\[Live Demo\]](#)

- Developed a scalable HR platform to automate employee data management, payroll processing, and administrative workflows
- Implemented **Role-Based Access Control (RBAC)** using **JWT** to ensure secure data access for different user tiers.
- Built a responsive and interactive dashboard using **React.js** and **Tailwind CSS**, offering real-time visual insights into company statistics.
- Architected a robust RESTful API with **ASP.NET Core 10.0**, using **Entity Framework Core** for optimized SQL Server database interactions.
- Managed cross-origin resource sharing (**CORS**) and deployed the decoupled architecture across **Vercel** and **MonsterASP**.
- Demo Accounts (User/Pass): admin/admin123 • hrmanager/hr123 • hrfinancial/finance123.

CERTIFICATIONS

Front-End Development Diploma | *SEF Academy* :

- Successfully completed Front-End program, including both learning and practical tasks and projects (February 2025 - September 2025)

TECHNICAL SKILLS

Programming Languages : JavaScript | Python (Basic) | C#

Backend: Node.js (Basic) | REST APIs | JSON | C# | ASP.NET MVC | ASP.NET API

Frontend: React.js | Bootstrap CSS | Tailwind CSS | HTML5 | CSS3 | JavaScript (ES6+)

Databases: MongoDB | SQL Server | Entity Framework Core | LINQ

Tools: GitHub/Git | Ajax | Postman

Others: Component-Based Architecture | Responsive Design | Basic Software Engineering Concepts | OOP | N-Tire Architecture | Design Patterns

OTHER SKILLS & LANGUAGES

Languages: Arabic (Native), English (Very Good/Professional)

Interpersonal Skills : Self-learner | Communication skills | Eager to learn | Initiative-taking

EDUCATION

Thebes Academy

Bachelor of Computer Science

Relevant Coursework: Database, Software Engineering, Operating Systems, Algorithms, Artificial Intelligence, Data structure.

UNIVERSITY PROJECTS

Lung Cancer Detection project:

- AI-powered web application for lung cancer detection. Built the frontend using React.js, integrated with backend AI APIs, and implemented image upload, prediction display, and user-friendly medical UI.
